## **DETAILED ACTION**

### ***Information Disclosure Statement***

1. Applicant's IDS Form-1449 does not meet the requirement of MPEP 609, 37CFR 1.98 (a) in that copies of foreign patents and non-patent literature documents are not provided.

### ***Election/Restrictions***

2. Applicant's election without traverse of Group I and catalyst species of formula (1), claims 1-6 and 10-11 in the reply filed on July 27, 2007 is acknowledged.
3. The search results indicate that the catalyst represented by formula (1) is novel, the search is now extended to the rest of the species.

### ***Claim Rejections - 35 USC § 112***

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1-7 and 10-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The definitions of the symbols of formulas (1)-(3) of claim 1 and formula (4) of claim 1 are provided in parentheses. Disclosing necessary limitation in a pair of parentheses should be avoided because the limitations following a term in a pair of parentheses is considered optional. Since these limitations here are necessary, the use of parentheses should be eliminated.

Art Unit: 1713

The polymerization process claim 11 is improperly depended on the polymer product claim 8. Appropriate correction is requested.

***Allowable Subject Matter***

6. Claims 1-7 and 10-11 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

There is no prior art teach or reasonably suggest the catalyst complexes of the instant claims. For example, Kristen et al. (US 6,559,326) discloses a late transition metal complex containing a phosphanyl phenolate ligand which is substantially similar the catalyst complex of formulas (2) and (3) of the instant claims. However, Kristen's complexes do not contain a hydroxyl group on the benzene ring of the phenolate.

Applicant is urged to cancel the non elected Group II, claims 8-9, in order to put the application in the condition for allowance.
